

OUR STORY

KEVIN + CONSTANTA

ABOUT US

Hello! We are a very creative, innovative, dynamic, friendly, and loving couple. Since meeting back in college, we knew there was something special about each other. For the past 17 years, we've been married and, within the last five years, have been renovating our dream family home in hopes to raise our future children in it. We continue to add big dreams and goals involving our home and future to make the best life possible. Our tremendous focus on health, wellbeing, marriage, and overall life happiness is what drives our decisions and pursuits. As big kids at heart, we love living life through the lens of a child and can't wait to share that with our future children as they grow up with us. We know our creativity, innovation, and high energy are only going to blossom much more by finally becoming parents.

OUR HOME + PETS

From the moment we started dating, we both fell in love with the private neighborhood in southern Michigan that we were blessed to move into five years ago. It is a calm, serene, and natural setting with views of water everywhere. It is a magical lake lifestyle with amenities that include a private beach, a marina, and private streets for a safe and fun environment that we would have wished for ourselves growing up. We are the most active couple in our neighborhood, bringing family fun and social events to our community, from 4th of July golf cart parades to festive Christmas and Halloween decorations, outdoor movie nights, and more. All of this sets the stage for the best family experience of our own someday.

WHAT LED US TO ADOPTION

We have always wanted to be parents, from the moment we married and even as far back as growing up as children ourselves. Our only desire for each other in this life was to become parents someday, and we never thought it would be a challenge to do so. After trying for several years, we realized we could not make biological children and turned to IVF, which unfortunately was also not able to help us create our family. Although this has been the most difficult and sad period in our lives, we never wavered on the dream of still becoming parents. Our chance to adopt a child gives us this dream and, most importantly, the opportunity to raise a loved child in our world.

SUBJECT IN SCHOOL: Band, CAD drafting, computer programming

OUR FAMILY & TRADITIONS

We are a boutique family and share a tremendous bond with Kevin's mom, who now lives right around the corner from us and whom we see on a regular basis. She has always been the core of our support in life and especially with our dream of becoming parents. Her support is unparalleled, and she can't wait to become a grandmother someday soon.

In addition, we enjoy extended family reunion gatherings (over a hundred consecutive years) that include second and third cousins and other distant relatives once a year and for very special celebrations. We are blessed to have such loving and supportive family members who have always wanted to see the best for us. We have longstanding friendships with wonderful people nearby in our town whom we stay connected with and who are also supportive of our adoption journey.

DEAR EXPECTANT MOTHER,

Getting to the adoption option has been the most challenging experience of our lives. Although we will never understand the emotions you are feeling as you consider adoption for your baby, we have also experienced hardship as well over several years of not being able to create a family through our own means and also through IVF. It's through each of our incredible journeys that there is peace and comfort in knowing that a beautiful experience can be made together. This decision to adopt your baby would be a lifelong, priceless gift, and we could never express the level of gratitude we would have toward you.

We are 100% content with the idea of adoption and the responsibility it requires. Our promise to you is that we will always love, cherish, and protect your child. We believe wholeheartedly that your child will have a unique, magical, and authentic life growing up with us as they become the best version of themselves and live their best life.

We're over the moon with excitement to become adoptive parents and turn the leaf on starting a new blessed chapter in our life as a family. Our home and hearts are wide open and ready for this moment, including all those who love and support us and will experience it alongside us.

With love and admiration,

Constanta & Kevin
